

Good day!

We are going to help you find the right fit for your ring.

1. First you must make sure that this file printed the correct size. Measure the sizer, it should be 100mm long.
2. Next, just cut out the finger sizer on the dotted line.
3. Now, make small cuts on the solid blue lines (A&B)
4. Wrap the sizer snugly around the finger where you plan on wearing your ring.
5. Slide slot A into a suitable slot B. Make sure it is a comfortable fit and the sizer fits over your joint.
6. There you go, you have the right US size

Handy Tip: After you have cut out the sizer, stick a piece of clear tape over it to make it a bit stronger.
